

Material Handling Equipment

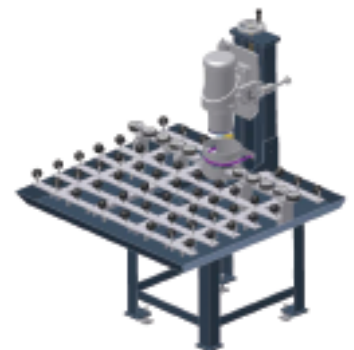

Specialty Material Handling Systems - flat or bent glass processing

Glassline has designed and produced many specialty material handling systems for use in fabrication plants from diverse markets including: Automotive, Appliance, Architectural, Furniture, Solar and others. We can design and build a system just for your facility, whether it is a simple pick and place operation, or more complicated servo positioning system, automated palletizing and depalletizing equipment, CNC tempering furnace loading/unloading systems, etc.

In addition to customized systems Glassline supplies a complete line of handling and conveyance equipment such as:

- ▶ Air Float Tables
- ▶ Accumulators
- ▶ Ball Castors and Tables
- ▶ Belt, Roll and Transfer Conveyors
- ▶ Flippers
- ▶ Nudgers
- ▶ Ovens
- ▶ Pallet Changers (Rotary and Linear)
- ▶ Part Squaring Stations – non-contact, shapes, rectangles
- ▶ Powdering Systems
- ▶ Rotators
- ▶ Shuttles
- ▶ Urethane and Neoprene Rollers

Glassline has many existing designs of material handling equipment – and we can custom design and build equipment to suit your specific handling needs.
